

Maxol Coolant

Description:

Maxol Coolant is an automotive coolant based on monoethyleneglycol and demineralized water with addition of additives.

- Perfect protection of all types of metals that are used in engines and cooling systems
- Neutral behaviour towards seals, gaskets and hoses
- Very good resistance against formation of foam

Application:

This coolant may be used all the year round in the cooling-systems of gasoline- and diesel engines. The coolant is ready for use and protected against freezing down to -38 °C.

Performance Level:

BS 6580:2010

Typical Characteristics:

Density at 15 °C, kg/l	1.080
pH – value	8.1
Reserve alkalinity, ml	11.5
Crystallization point, °C	-38

Important:

Always observe the manufacturers specifications when selecting products.
Maxol Lubricants reserve the right to change this product specification without notice.
